ScanAR

## Precise and **reliable** 3D tracking solutions.

ScanAR leverages cutting-edge VR technology to offer 3D verification and quality control for your manual build processes. Get real-time, high-speed positional data to verify, sequence, or track tools in a work cell.

Applications of ScanAR

Your go-to solution for range of applications, including:

- Enforcing sequence for rundown processes

- Verification of operator's actions

- Automatic selection of P-SET per bolt

- Operator hand sorting and bin picking

- Validation of tools position in 3D space

- Real time digital twin of operator process

Elevate your industrial processes with ScanAR
